

BUTLER COUNTY COMMUNITY COLLEGE

PUBLIC SAFETY TRAINING FACILITY

10-Hour OSHA Construction Safety & Health

Due to new regulations from OSHA we had to make changes to our 10-Hour OSHA schedule. Instead of the class being completed in one day we are required to split the class into two days.

This is the 10-Hour OSHA Construction Safety & Health Training that is required within the Oil & Gas Industry.

Registration can be made by calling 888-826-2829 Ext. 8358 or fax the registration to 724-284-8548.

Payment methods are Visa, MasterCard, Discover, American Express or Check (Made Payable to Butler County Community College).

If you would prefer us to Invoice the company we are required to have an authorization from the company on their letterhead or Purchase Order stating who and what they are paying for.

**Due to students registering and not showing up for class:
If a registration is not cancelled within 48 hours prior to the class any No Show or Late Cancellations will be invoiced for the class.**

A textbook will be available for use and available for purchase (\$40.00 cash or check only) if the student wishes to purchase one.

Class Date	Course Number	Time	Cost per Person
